SystemIntegrationTest()

Class SystemIntegrationTest

java.lang.Object

tests.SystemIntegrationTest

@TestMethodOrder(org.junit.jupiter.api.MethodOrderer.Or

public class **SystemIntegrationTest**

extends Object

Integration tests for the User Question and Answer System.

This class tests the core functionalities of the system,

including user registration, login, role management, and

deletion. It ensures that the database operations are working

correctly and validates role-based access control.
